DENTAL LABORATORY INC

LIVE C.E. PROGRAM

BUILT TO LAST:

Delivering Strength, Hygiene, and Function with
the Precision of Photogrammetry Workflows

October 15th, 2026

Ottawa, ON

LEARNING OBJECTIVES:

- Review implant bar solutions that optimize function, aesthetics, and hygiene.
- Navigate full arch protocols beyond surgical considerations, from immediate provisional fabrication and delivery through to predictable final restoration.
- Master the full-arch photogrammetry workflow to ensure predictable passive fit with fewer appointments.
- Finding the optimal mandibular advancement device for patients with sleep-disordered breathing.

SPEAKERS:

Andreas Klie RDT

Senior Technical Expert,
Panthera Dental

Shawn Parisien RDT

Laboratory Manager
Watersedge Dental Lab
